RE: Denver Water's WISE DIA Connection Project

City of Commerce City:

I am writing in support of Denver Water's WISE DIA Connection project that is currently going through the review process with Commerce City. South Adams County Water and Sanitation District is partnering with Denver Water on this project that will fast-track infrastructure needs along the E-470 and 96th Avenue corridors and reduce the cost of construction for our rate payers.

With continued development in this area and the potential for more Industrial and Commercial growth, having the infrastructure in place ahead of the growth can make it a more appealing area for prospective developers.

Sincerely,

A handwritten signature in black ink, appearing to read "Marc Johns", is written over a light blue horizontal line.

Marc Johns
