A. Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex or national origin. Contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex or national origin. Such action shall include, but not be limited to the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rate of pay or other forms of compensation; and selection for training, including apprenticeship. Contractor shall post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination.

B. Contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive considerations for employment without regard to race, color, religion, sex or national origin.

C. Contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representatives of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

G. Contractor will include the provisions of the sentence immediately preceding paragraph A and the provisions of paragraphs A through G in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to Section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for non-compliance: Provided, however, that in the event a contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency the contractor may request the United States to enter into such litigation to protect the interests of the United States.

I. Contractor will refrain from entering into any contract or contract modification subject to Executive Order 11246 of September 24, 1965, with a contractor debarred from, or who has not demonstrated eligibility for, government contracts and federally assisted construction contracts pursuant to the executive order and will carry out such sanctions and penalties for violation of the equal opportunity clause as may be imposed upon contractors and subcontractors by the administering agency or the Secretary of Labor pursuant to Part II, Subpart D of the executive order. In addition, the applicant agrees that if it fails or refuses to comply with these undertakings, the administering agency may take any or all of the following actions: Cancel, terminate or suspend in whole or in part this grant (contract, loan, insurance, guarantee); refrain from extending any further assistance to the applicant under the program with respect to which the failure or refund occurred until satisfactory assurance of future compliance has been received from such applicant; and refer the case to the Department of Justice for appropriate proceedings.

Contractor certifies further that Contractor will not maintain or provide for employees any segregated facilities at any of Contractor's establishments, and Contractor will not permit employees to perform their services at any location under Contractor's control where segregated facilities are maintained. **Description**

This project will include design and construction of sidewalks and curb ramp improvements at various locations in Commerce City. Curb ramps will be upgraded to meet current ADA standards. This scope of work includes but not limited to:

- Project Management and administration
- Environmental clearance and documentation
- Topographic survey
- Existing utility investigation
- Ownership/Right of Way Map
- Final design
- 90% and Ad Plans, Specifications & Cost Estimate

The work areas included in this scope of work are at various locations throughout Commerce City. These work areas include:

- Rose Hill #1
- Kemp #1, curb ramps only
- Central #3

This project is in cooperation with Community Development and Block Grant (CDBG) program administered by the U.S. Department of Housing and Urban Development (HUD). This scope of work assumes that all coordination with HUD is conducted by the City of Commerce City and is not included in the cost of the work. The scope of work seeks to meet HUD's Timeliness Test for the City with drawdown goal of \$40,000 on the sidewalk projects by the end of July 2018. Jacobs assumes no responsibility for any 3<sup>rd</sup> party delays that would interfere with the ability to meet the drawdown goal or project schedule.

**Task Order Duration**

This Task Order has a period of performance through December 31, 2018 and will be executed through the 2017 Commerce City General Engineering On-Call Services contract.

## **Jacobs Scope of Work**

### **Task 1: Project Initiation and Continuing Requirements**

#### **1.1 Meetings**

##### **a. Project Status Meetings:**

Commerce City and Consultant team will meet periodically as required. The meetings will review: activities required to be completed since the last meeting, problems encountered/anticipated and potential solutions, project schedule update, action items, and coordination required with other agencies. Status meetings will be held in person or via conference call, depending on need. Meeting action/decision log will be prepared and distributed within 5 working days of the meeting. Assume 6 meetings.

##### **b. On-site inspection:**

To familiarize the entire project team with the character and conditions of the area. Assume 1 site visit.

#### **1.2 Project Management**

Create an approach for managing the project (i.e. involved staff, key team positions), a schedule, document and agency reviews and other project needs. The Consultant shall coordinate all the work tasks being accomplished by all parties to ensure project work completion stages are on schedule.

##### **a. General Coordination with Client**

##### **b. Coordination and Oversight of project team**

##### **c. Develop project schedule and assign tasks**

The Consultant is responsible for coordinating the required work schedule for tasks accomplished by the client and other agencies. Prepare the initial project schedule for use during project status meetings, and as requested. Modifications will be made as necessary in collaboration with the Client. Maintain the following schedule documents:

- Simplified bar chart schedule identifying key milestones
- Project calendar of meetings and key milestones (as needed)

d. **Monthly Progress Reports.**

Jacobs will provide monthly status reports and billings. Expenditures on 2016 vs. 2017 Grant Funding projects will always be billed separately.

e. **Monthly Management Budget and Schedule Review**

During the life of the project, it is expected Jacobs will review the progress of the project and report any concerns to the client. This includes updating estimates for completing the project, review if the project is on schedule, and status of every element of the project. Assume 1 hour per month for 4 months.

**1.3 Quality Assurance/Quality Control (QA/QC)**

At project initiation, a Project Specific Quality Plan (PSQP) will be developed to document the QC process associated with this scope, assign qualified professionals to perform each review, and provide the review schedule. During the life of the project, Jacobs completes monthly reviews of the project QA/QC process. These reviews will confirm that the PSQP is adequate and appropriate to the scope of the project (initial review) and is being followed properly and on schedule.

**1.4 Safety**

At project initiation, a Hazard and Safety Assessment Plan (HASAP) will be developed to address all potential safety concerns associated with the work on this project. This document will guide all field work on the project and any other site visits or project related travel.

**Task 2: Environmental**

**2.1 Desktop Research and Field Data Collection**

- a. Review relevant and readily available data and information sources to determine presence/absence of resources as required for projects Categorically Excluded per 24 CFR 58.35(a), and subject to laws and authorities at §58.5 and §58.6 (CEST). A 2-Tiered CEST will be utilized by Jacobs and the City, unless and until the environmental review's classification or scope needs to change.
  - i. This scope assumes there are no sensitive resources in the vicinity and no potential for impacts to adjacent resources.
  - ii. Because this scope assumes the project has no potential to effect historic resources, this task excludes primary and secondary source research to identify potential significance of historic resources.
  - iii. This task will include one on-site visit to take *before* photographs and to get an overview of each potential project site. The task excludes any specific on-site investigation to confirm presence/absence of resources identified during desktop research.

- iv. Should this scope change both parties may agree to a Change Order in written form.

## **2.2 Agency Coordination/Approvals**

- a. This scope assumes no consultant support for any necessary agency coordination or approvals. Commerce City will contact and request information from the necessary agencies as needed and upon Jacobs' request.

## **2.3 Partner Worksheets**

- a. Complete partner worksheets outside of HEROS as necessary to support the Environmental Review for Activity/Project that is Categorically Excluded Subject to Section 58.5 and 58.6. This scope assumes up to 17 worksheets, one for each environmental topic, will be prepared. Supporting documentation will consist of up to 8 maps.
- b. The map and any other visual documents will be conveyed to the City in pdf. and where appropriate native GIS files.
- c. As each environmental topic partner worksheet and related documents are completed, they are to be sent to the City's CDBG Coordinator at [csteinberg@c3gov.com](mailto:csteinberg@c3gov.com).
- d. Address two rounds of comments from CCC and finalize worksheets.

## **2.4 Complete Environmental Review Form**

- a. Prepare form documenting Environmental Review for Activity/Project that is Categorically Excluded Subject to Section 58.5
- b. Address one round of comments on draft documentation from CCC and provide final documents for signature.

## **Task 3: Survey, Right of Way and Utilities**

### **3.1 Permits/Right of Entry Forms**

The consultant will apply for three (3) right-of-way permits from Commerce City in order to perform survey work within the existing rights-of-way. In addition, it is anticipated that Jacobs will need to prepare right-of-entry forms for approximately seventeen (17) adjoining landowners to the sidewalk areas being surveyed. Since the sidewalk project locations or design details have not been finalized, Jacobs will not convey any specific project details with the landowners. Commerce City will follow up with any landowners that do not grant survey access to field personnel.

### **3.2 Survey Control**

Jacobs will establish project control based on the City of Commerce City requirements. It is anticipated the consultant will need to set at least three (3) project control points at each of the 3 site locations. The control points will be semi-permanent in nature and will be accessible and available for use if construction is to occur at the site. As part of this task, Jacobs will prepare a project control diagram in Commerce City format.

### **3.3 Topographic survey**

Jacobs will collect information, by conventional survey field methods, of existing, visible planimetric features and topography capable of generating a dtm surface with one-foot (1') contour interval. The topographic survey will include the existing edge of pavement, centerline, curb/gutter, striping, sidewalks, traffic signals, culverts, structures, surface utility evidence and landscaping within the existing rights-of-way for all 3 site locations. Information collected outside the right of way along the proposed sidewalk will greatly depend on right of entry approval from adjoining private owners. If right of entry is obtained Jacobs will extend the survey ten (10) feet beyond the existing right of way. All electronic deliverables will be provided in AutoCAD Civil 3D 2018 format. Jacobs will procure traffic control for work they are performing.

### **3.4 Underground Utilities**

This scope of work will include mapping for underground utilities within the above-described topographic survey limits via one call services. Once the utilities have been marked by utility companies, Jacobs will survey the paint mark locations. No additional locates or potholing is included in this scope of work.

### **3.5 Ownership/Right of Way Map**

In order to determine existing right-of-way limits in work areas, Jacobs will obtain Commerce City Right of Way Survey information, vesting deed information, subdivision plat, and other recorded survey information for approximately seventeen (8) parcels. Based on this information, we will look for Right of Way monumentation (Commerce City Right of Way Monuments and Private Survey Monuments) within the survey limits described in Section 3.3. If no monumentation is found existing evidence of right of way will be located (centerline of street, fence lines, right of way signs) and used to determine the location of Right of Way lines. All found monumentation and Right of Way evidence will be shown in conjunction with ownership and record information on the ownership/right-of-way map and reference into design drawings as appropriate.

## **Task 4: Final Design**

### **4.1 Roadway Final Design**

Complete final design for work areas in the 'Description' section above. Assume 90% and Advertisement Plan and Specification packages. Design will be completed in accordance with City of Commerce City Engineering Construction Standards and Specifications.

**a. 90% Design, Plans and Specifications**

- i. 90% design will be completed and plans will be developed. It is anticipated that the 90% plan set will include the following sheets:
  - Title Sheet/Index
  - Standard Plans List
  - General notes
  - Summary of Approximate Quantities and Tabulation sheets
  - Survey control diagram
  - Horizontal geometry and control
  - Plan and profile sheets including typical sections
  - Curb ramp and driveway details
  - Roadway cross sections at appropriate interval, if necessary
- ii. Quantities and Opinion of Probable Construction Costs  
Quantities and associated item costs will be prepared for review. This work includes establishment of pay items, associated quantities and creation of cost estimate spreadsheet.
- iii. Specifications  
Preparation of Standard and Project Design Specifications will be prepared for any unique design items, materials, etc or products outside of the City Commerce City Standard Specifications.
- iv. QA/QC  
Complete QA/QC on the 90% plans prior to submittal to City of Commerce City.
- v. Prepare for and conduct 90% review meeting

**b. Ad Plans and Specifications**

- i. Comment Resolution  
Any comments from 90% review meeting will be logged and responses will be provided to City of Commerce City
- ii. Incorporate 90% comments into Plans and Specifications and provide to City for use in Advertisement Package
- iii. Update quantities and Opinion of Probable Construction Costs, as necessary

**4.2 Hydraulics and SWMP Final Design**

Evaluate existing and proposed curb and gutter (for the specified project areas) for any drainage issues or conflicts. Provide SWMP (erosion control plans) for final Ad Plans. A drainage report will not be included for the project.

**a. 90% Design, Plans and Specifications**

- i. Design grading adjustments to propagate positive drainage as needed
  - Any necessary drainage design will be included on the roadway design plan sheets
  - It is assumed that no existing or proposed inlets or pipes are included in the work.
- ii. Evaluate design for utility conflicts and support conflict resolution
- iii. Support for Quantities, Opinion of Probable Construction Costs, and Project Specifications (as needed)
- iv. QA/QC  
Complete QA/QC on the 90% plans prior to submittal to City of Commerce City

**b. Ad Plans and Specifications**

- i. Support Comment Resolution
- ii. Support Incorporation of 90% comments into Plans and Specifications

### 2.1 ROW boundary work for Fee Acquisitions

Assumes five (5) properties (Property ID R1-R5, see table above)

#### a. Field Work and Calculations

In support of fee acquisition of private property to accommodate design features outside of existing right of way, Jacobs will perform additional field survey work to help solidify the existing right of way and property lines of impacted properties. Previously performed field work resulted in insufficient existing right of way and private monumentation to adequately support fee acquisition. Jacobs will set rebar and cap to monument acquisition parcels, and record and land survey plat depicting the monuments set in accordance with Colorado Revised Statutes (CRS) and Colorado State Board Rules for Professional Land Surveyors.

### 2.2 Title Review, Descriptions and Exhibits

#### a. Title Review, Descriptions & Exhibits for Base Bid Acquisitions (Property ID R1-R5 & T1)

Jacobs will prepare a legal description and exhibit drawing for property to be purchased in fee, total of five (5) fee parcels (Property ID R1-R5). Geometry depicting the size and shape of temporary construction easements adjacent to fee parcels will be shown on the associated exhibits. Jacobs will also prepare an exhibit drawing depicting the size and shape of temporary easement of one (1) property (Property ID T1).

b. Exhibits for Bid Alternatives Acquisitions (Property ID T2-T5)

Jacobs will prepare exhibit drawing depicting the size and shape of temporary easements, total of four (4) exhibit drawings.

**Task 3: Design**

**3.1 Right of Way support**

- a. Review and provide comment on all acquisition exhibits completed in Task 2. Assume one (1) round of review.
