- Supervision of personnel on my team for the aforementioned installation

Certifications:

CCNA, MCSE, MCP + Internet, Shoretel VOIP certified, ITIL certified

Education:

New England Institute of Technology; West Palm Beach, Fl.

Graduated - 12/96

Specialized Associates Degree in Computer Networking & Hardware technology

I am applying to be on the 3C City council as I feel with my all-around experience with living in other states and in Colorado for ~20 years gives me a perspective on how Government activities are performed elsewhere and locally. Additionally, my experience in IT and other fields will bring a fresh Perspective for opinions and input into C3 challenges.

I have no experience in City Council and would like to see how the sausage is made when pertaining to Local government activities.

My thoughts on the history of Colorado and Commerce City in general is to maintain the vibrant history that makes this a truly great state and city to live in.

The 3 most pressing challenges in C3 right now, I feel are solidifying an Identity as a city, We need to decide whether we are a trucking/oil and commodity city, a residential community where it is safe to raise a family, or if we are an agricultural community. We could be all three but as a whole, I feel, we will need to segregate certain areas to be relegated to be solely dedicated to whatever the neighborhoods are designed for. This ideal would encompass the 3 most pressing challenges we are facing as a community.

The biggest Opportunities in 3C, I believe, are concerning land development and attracting businesses to this area. We have swaths of land off of C470, Tower, and along Vasquez blvd that can be expanded to gentrified.

I have no concerns or compunction about serving my city proudly, If it means quality improvements that I may be part of. I would like to participate in improving my community which gives me a sense of pride in accomplishment I performed something that made my neighbors life easier and increased happiness to my community.

I have not served on any governmental boards thusfar, but I was on the HOA board of my community while I lived out of state. I had introduced common sense logic to HOA activities to avoid misspending and kept our HOA fees low.

I have lived In Commerce City going on 6 years, I had moved from Northglenn where I lived for 8 years while working as a IT Systems Administrator for the Adams County Mental Health Centers for 5 years (there are a handful of locations for ACMHC). Prior to that I lived in Arvada and Thornton. I enjoy the Golf Courses at Buffalo Run and the many restaurants in the area.

I attest to the above documents and swear by it authenticity and demeanor

Sincerely,
Michael Storozum
