

Central Elementary School Playground

GOCO Grant Partnership

“Quality Community for a Lifetime”

- The city is partnering with Adams County School District 14 to apply for a Great Outdoors Colorado (GOC) grant.
- This is a special grant cycle, the School Play Yard Initiative, that is specifically for the construction of new school play yards and improvement to existing school play yards.

- The city is not providing any funding for this project.
- The school district cannot apply for funding from GOCO directly; the city must be the applicant and partner with the school district.

- The school district is asking for \$100,000 from GOCO and they are providing at \$42,900 match.
- The project proposed in the grant application is the construction of a new playground at Central Elementary School.

- If the project is funded, the school district will complete the project and submit documentation to GOCO.
- The funding will then be disbursed to the city and we will give it to the school district.
