- B. Space Program
- C. Siting Concept
- D. Planning Concept

IV. ROUGH ORDER OF MAGNITUDE (ROM) COST ANALYSIS

I. EXECUTIVE SUMMARY

EXECUTIVE SUMMARY

Over the course of approximately 13 weeks, Commerce City and HOK have met with stakeholders to understand future needs for the Commerce City Police Department and Municipal Court. This information was used to develop a space program for each department (Section III), and the totals from this exercise provided the basis for development of a planning concept to meet the future facility needs (Section III). In addition, rough order of magnitude (ROM) cost analyses were created (Section IV).

The program is organized by department for both the police and municipal court. The police department includes the lobby, police administration, patrol operations, support services and support services. The municipal court includes the lobby, screening, municipal courtroom, court administration, and jury services. Both the police department and municipal court utilize shared building support to optimize the amount of mechanical and electrical equipment required to support the facility. The program also includes a dispatch center, which is anticipated to be built after the new facility is operational, as well as shell space and a municipal court expansion. The full Space Program Summary and Space Program document can be found in Section III of this report.

ROUGH ORDER OF MAGNITUDE (ROM) COST ANALYSIS

The HOK team has prepared a ROM construction cost estimate based on the space program. The estimate is prepared in the context of 2022 costs and is then multiplied by factors including land acquisition cost, design and management fees, owner costs, etc. The total cost using 2022 values in the estimate is then escalated to account for price increases that will occur during the design and construction phases of the project. A document of this analysis can be found in Section IV of this report.

ANTICIPATED PROJECT SCHEDULE

Based on the information contained in this report and discussions with the City Manager’s Office, the following anticipated project schedule was developed; this potential schedule is the basis by which the ROM cost estimate is escalated and provides a general overview of the expected phases and their lengths.

Design/Land Funds	Available October 2022
Design (24 months)	Start December 2022 Complete December 2023
Bid/Permit (2 months)	Start December 2023 Complete February 2024
Construction (23 months)	Start February 2024 Complete December 2025

II. INTRODUCTION

INTRODUCTION

We would like to begin by thanking Commerce City officials, the Commerce City Police Department, and the Commerce City Municipal Court for your active participation in this study. Your investment in addressing both current and future needs in providing services to the citizens of Commerce City gives this report a solid foundation upon which the Commerce City Council can base decisions on upcoming steps to address the future needs of the police and courts.

PROJECT GOALS

As the population of Commerce City continues to grow, with anticipation to double by 2030, the city's project goals include the evaluation for a new facility to house police, municipal court, holding and expansion area for a future dispatch center. The overarching goal for this phase of work is to develop a feasibility study capturing the anticipated space/land needs and anticipated budget for project development.

PROJECT APPROACH

The HOK team worked closely with the Commerce City Administration team, the Commerce City Police Department, and the Commerce City Municipal Court in a series of meetings to understand the needs of a future facility. Following these sessions, the items listed below were analyzed and developed:

1. Analysis of existing conditions
2. Documentation of current and future space needs
3. Development of a conceptual floor plan adjacency diagram
4. Development of a conceptual site plan
5. Rough Order of Magnitude (ROM) Cost Analysis

The information compiled in this report provides the City with a recommended facility size and space needs assessment to help support the design and construction of a future facility. This facility may function as a substation or as a secondary headquarters in the eastern region of Commerce City.

SCOPE & SCHEDULE FOR NEXT STEPS (DESIGN & CONSTRUCTION)

Moving forward the HOK team has outlined key steps starting at land acquisition through the end of construction (a list of anticipated dates can be found in Section I). By taking advantage of early decision making, the City can avoid higher escalation costs and address some of the established deficiencies of the current facilities. This roughly three year process would also need to be paired with continued coordination with the City regarding regulations.

ACKNOWLEDGMENTS

The HOK team would like to directly thank the following individuals listed and the many additional staff and team members unlisted that also contributed to this report:

City Council of Commerce City

Benjamin Huseman, Mayor
Kristi Douglas, Councilmember, At-Large
Sean Ford, Councilmember, At-Large
Meghan Grimes, Councilmember, At-Large
Craig Hurst, Councilmember, At-Large
Oscar Madera, Councilmember, Ward I
Jennifer Allen-Thomas, Councilmember, Ward II
Rick Davis, Councilmember, Ward III
Susan Noble, Councilmember, Ward IV

City Manager's Office of Commerce City

Roger Tinklenberg, City Manager
Cathy Blakeman, Deputy City Manager of Internal Services
Jason Rogers, Deputy City Manager of External Services
Sheryl Carstens, Director of Finance
Justin Bingham, Director of IT
Joe Wilson, Director of Public Works
Trenten Robinson, Management Analyst, Project Manager
Annette Peters, Executive Administrator, City Manager/Mayor & City Council

Commerce City Police Department

Clinton Nichols, Chief of Police
Dennis Moon, Deputy Police Chief
Gregory Sadar, Deputy Police Chief
Kirk Dominic, Emergency Manager
Kiana Jodell, Executive Administrative Supervisor
Commerce City Police Command Staff

Commerce City Municipal Court

Judge Brian Bowen
Adam Gollin, Municipal City Prosecutor
Maya Kiesnowski, Municipal Court Supervisor

HOK

Jeff Goodale, Director of Justice
Jason Wandersee, Regional Leader of Justice, Principal in Charge
Jeff Davis, Regional Leader of Planning
Kristen Zilch, Senior Justice Planner
Ashlyn Jach, Justice Planner
Jerry Philbin, Landscape Design Professional

III. PROGRAMMING & CONCEPT

PROGRAM METHODOLOGY OVERVIEW OF SPACE NEEDS ASSESSMENT

The space program is an assessment of the current and future space needs for each department. It forms the basis for development and concepts for the new police and municipal courts facility. The HOK team interviewed the police department and the municipal courts, as well as some members of the City Manager’s team, reviewed plans of the current Commerce City Civic Center. From this information, a program was developed with space standards across departments, quantities of spaces were generated, and future growth was estimated based on the departments expectations for future staffing and operations needs. The program was reviewed by each department and revised where appropriate before finalizing this program.

The program is divided into sections, numbered 1.0 through 6.0, plus an additional section for a future Dispatch Center, a municipal court expansion, and a warm shell space.

The individual departments include:

- 1.0 Public Support
- 2.0 Police Administration
- 3.0 Patrol Operations
- 4.0 Support Services
- 5.0 Municipal Court
- 6.0 Building Support
- D Dispatch
- E Municipal Court Expansion
- S Shell

It is envisioned that all of these departments will reside within the same facility, with the exception of Dispatch, which may be built later as an addition to the new facility, or a freestanding facility on the same site.

Program areas are all designated in square feet and include net, departmental gross and building gross.

Net Area (NSF) is defined as the interior area of each space from face of wall to face of wall. The program table assigns a net area to each space which is then multiplied by the number of spaces and totaled at the bottom.

Below the total Net Area is a total **Departmental Gross Area (DGSF)**. The DGSF includes corridors within the department to get from space to space and the thickness of internal walls and chases. This number is generated by applying a Departmental Efficiency Factor to the total NSF of each department.

The space summary lists each department and its departmental gross area. A separate overall efficiency factor is added to account for space to circulate between departments including corridors, stairs and elevators, public toilets, janitor closets, building systems and support spaces such as electrical and mechanical rooms not listed in the space list, and a thickness of the exterior wall which will wrap the building. This calculation results in a projection of the total **Building Gross Area (BGSF)** and is a preliminary benchmark for the size of the building.

TABLE FORMAT

Each department is assigned a whole number. The first column assigns a space number to each type of space within the department by adding three digits to the right of the department number, such as 1.101. The second column is the name of the space/function of the space. The following two columns are for Existing Spaces and 2040 Space Projections, with each divided into four categories, followed by a space for additional comments. The categories include Staff, Number of Areas, Space Standard per space (in SF) and Net SF (the product of the number of space sand the space standard).

The Existing Spaces provides a reference point for the spaces the team was able to identify and measure from existing Civic Center facility plans. Many of the rooms found in the space program are new for the future facility or could not be identified in existing plans, so the related lines in the program will be blank in the “Existing Spaces” column. Because these columns are not complete, they are not shown in the Space Summary. Instead, an estimated BGSF is provided based on the existing facility, separating the City offices from the Police Department in order to reach this total.

The 2040 Space projections applies to staffing projections based on Commerce City population projections and your input through questionnaires and in meetings applied to the space standards.

Departmental and Site Planning Overview

In order to understand the site needs of a future facility, the space program was used in the development of a conceptual site plan. This site plan works in conjunction with the conceptual building floor plans to understand the various methods of site access and parking needs.

To the east side of the building in this concept, the public is able to access the facility; this side also serves as access for dock deliveries. To the west, police and other building staff can enter a secure parking lot, and police can enter the vehicle sallyport to bring detained individuals in for processing. Within the secure fence as well is a drive to access police vehicle storage, which houses the larger utility vehicles utilized by the police department.

The arrangement of the building planning is such that the police department and the municipal court have separate entries. These entries are separate and distinct from each other so that the police department and municipal court can share building support functions such as mechanical and electrical spaces, but do not present as a single entity to the public. Building expansion space is shown at the south end of the police department for a future dispatch center and at the southeast corner of the municipal court for potential courts growth.

By examining the parking needs of the existing police facility and comparing it with the projected staff count and public needs of a future facility, this conceptual site plan includes:

- 300 public parking spaces
- 151 secure parking spaces
- 24 future expansion spaces for secure parking

The following pages include the concept site plan, first floor concept plan, and second floor concept plan. These do not represent a final planning arrangement for this facility, but rather offer an early understanding of how much space is required and how the building could be arranged to address the needs of the users.

Programming CONCEPT SITE PLAN

FIRST FLOOR CONCEPT PLAN

The first floor concept plan houses most of the police department, all of the municipal court functions, and the building support space. Two separate lobbies are created to give each user a distinct public face. This arrangement allows the police and municipal court to share building support functions while maintaining separate identities with the public. The U-shape of the building also provides an opportunity for a secure staff courtyard that can be utilized by both police staff and municipal court staff.

not to scale

SECOND FLOOR CONCEPT PLAN

The second floor concept plan houses police department functions. These departments serve important functions within the police department but do not necessarily need immediate first floor access.

not to scale

IV. ROM COST ANALYSIS

Rough Order of Magnitude Cost

OPTION 1

This Opinion of Probable Cost includes the base program without the municipal court expansion. It does not include Dispatch Center or Shell.

Opinion of Probable Cost (DRAFT V3) - Commerce City, CO Justice Center (July 22, 2022)					
Option 1: Architectural Space Program - July 6, 2022					
Land Costs ²		\$ 1,497,209	\$ 2,620,115		
Utilities, Parking Lot, Landscape		\$ 200,000	\$ 250,000		
		Per Square Foot Range		Range	
New Construction ¹	GSF	Low	High	Low	High
Public Support	4,435	\$ 307	\$ 327	\$ 1,360,498	\$ 1,451,197

Total Construction + Land - 2022\$				\$ 71,112,194	\$ 77,745,858
Total Construction + Land - 2024\$ ²⁺³				\$ 79,710,980	\$ 87,067,039
Owner understands that HOK's services may include advice and recommendations related to a potential construction budget. However, Owner acknowledges that all decisions in connection with the implementation of such advice & recommendations shall be the responsibility of and made by Owner. Owner acknowledges that HOK is providing its services with the understanding that contemporaneously Owner is consulting with a legal professional, an insurance professional, a financial professional, and a construction professional to provide advice, recommendations and information related to those professionals' area of expertise. Owner understands, recognizes and agrees that HOK does not warrant or represent that a Project will actually be built for a specific price. Owner acknowledges that financials of any project is dependent on numerous factors outside of the control of HOK. Owner further acknowledges that HOK is not performing any management functions, nor making any management decisions for Owner.					
Note 1: Includes Commerce City Use Tax for materials only					
Note 2: Includes estimated escalation costs to projected close of purchase date: March 2023. Assumes 8 acre parcel with low/high range from City					
Note 3: Includes estimated escalation costs to projected receipt of bids date: January 2024					

Rough Order of Magnitude Cost

OPTION 1A

This Opinion of Probable Cost includes the base program with the municipal court expansion. It does not include Dispatch Center or Shell.

Opinion of Probable Cost (DRAFT V3) - Commerce City, CO Justice Center (July 22, 2022)
