2016 Pavement Maintenance Project Update

Summary and Background Information :

The City is responsible for 264.3 centerline miles of streets. The most recent inspection of Commerce City's streets conducted in 2008, gave the entire network an average OCI of 73.4, which is considered Good overall. Commerce City's Street Rehabilitation and Pavement Maintenance Program places a priority on maintaining the streets that are in Good condition. As street maintenance is deferred, more expensive repair strategies become necessary. Therefore, it is much more cost effective to maintain streets which are in good condition to keep them at that level. The goal of the City's Street Rehabilitation and Pavement Maintenance Program is to continuously maintain the City's street network in a safe and fiscally responsible manner. To accomplish this, the Public Works Department programs and implements cost-effective maintenance and repair strategies in a manner that will maximize the service life of a given street. Staff will present the planned improvements for 2016.

Staff Responsible (Department Head): Maria D'Andrea, Director of Public Works
