### High Hazard Zones

**Summary and Background Information:** On October 23, 2023, staff made a presentation to City Council recommending the adoption of the 2020 Model Traffic Code Revised Version 2 (MTC) and Council approved Ordinance 2553 on December 1, 2023. This recommendation was made for the following reasons:

- \* Uniformity of basic road rules
- \* Uniformity of local traffic regulations
- \* Standardization of traffic regulation and control on streets that are state highways
- \* Compatibility of traffic ordinances with the State and National vehicle codes
- \* The City has not updated the MTC to be current since 2010.

During this presentation, staff recommended keeping the language and code in the adopted MTC for High Hazard Routes.

**Staff Responsible (Department Head):** Chief Darrel Guadnola

**Staff Member Presenting:** Commander Dave Mowery
