Approval Criteria

A decision for a PUD Amendment is based on the following criteria from Sec. 21-3251(3) of the 2009 LDC.

Criteria (a): The PUD zone document is consistent with the policies and goals of the comprehensive plan, any applicable adopted area plan, or community plan of the city, or reflects conditions that have changed since the adoption of the comprehensive plan;

Criteria (b): The PUD zone document is consistent with any previously reviewed PUD concept schematic;

Criteria (c): The PUD addresses a unique situation, confers a substantial benefit to the city, or incorporates creative site design such that it achieves the purposes set out in section 21-4370 (PUD Zone District) and represents an improvement in quality over what could have been accomplished through strict applications of the otherwise applicable district or development standards. This may include but is not limited to improvements in open space; environmental protection; tree/vegetation preservation; efficient provision of streets, roads, and other utilities and services; unique architecture or design, or increased choice of living and housing environments;

Criteria (d): The PUD complies with all applicable city standards not otherwise modified or waived by the city;

Criteria (e): The PUD is integrated and connected with adjacent development through street connections, sidewalks, trails, and similar features;

Criteria (f): To the maximum extent feasible, the proposal mitigates any potential significant adverse impacts on adjacent properties or on the general community;

Criteria (g): Sufficient public safety, transportation, and utility facilities and services are available to serve the subject property, while maintaining sufficient levels of service to existing development;

Criteria (h): As applicable, the proposed phasing plan for development of the PUD is rational in terms of available infrastructure, capacity, and financing; and

Criteria (i): The same development could not be accomplished through the use of other techniques, such as height exceptions, variances, or minor modifications.
